This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

ASTROPHYSICAL JOURNAL

A GENERAL INDEX

By Authors and By Subjects

to

VOLUMES I to XXV

(January 1895 to June 1907)

Compiled by

STORRS B. BARRETT

LIBRARIAN OF THE YERKES OBSERVATORY

CHICAGO

THE UNIVERSITY OF CHICAGO PRESS

1908

LIBRARY

UNIVERSITY OF CALIFORNIA

DAVIS

Composed and Printed By
The University of Chicago Press
Chicago, Illinois, U. S. A.

THE ASTROPHYSICAL JOURNAL

EDITORS

Vols. I to XII, GEORGE E. HALE AND JAMES E. KEELER*
XIII to XIV, GEORGE E. HALE
XV to XXV, GEORGE E. HALE AND EDWIN B. FROST

COLLABORATORS

(Designated as Assistant Editors and Associate Editors in Vols. I to XIV)

J. S. AMES	I–XXV	ERNEST F. NICHOLS	VIII–XXV
A. BELOPOLSKY	XVI–XXV	A. PEROT	XXIII–XXV
W. W. CAMPBELL	I–XXV	E. C. PICKERING	I–XXV
*M. A. CORNU	I–XV	A. RICCÒ	XXIII–XXV
HENRY CREW	I–XXV	*H. A. ROWLAND	I–XIII
N. C. DUNÉR	I–XXV	C. RUNGE	XVIII–XXV
C. FABRY	XXIII–XXV	ARTHUR SCHUSTER	XXII–XXV
E. B. FROST	I–XIV	*P. TACCHINI	I–XXIII
C. S. HASTINGS	I–XXV	*H. C. VOGEL	I–XXV
WILLIAM HUGGINS	I–XXV	F. L. O. WADSWORTH	I–XXV
H. KAYSER	XVII–XXV	C. A. YOUNG	I–XXV
A. A. MICHELSON	I–XXV		

* Deceased.

The editors of the *Astrophysical Journal* gratefully acknowledge a grant of One Hundred Dollars by Professor E. C. Pickering from the International Science Fund of the Harvard Observatory to assist in the publication of this *General Index*.

GENERAL INDEX TO VOLUMES I–XXV

AUTHORS

	VOLUME AND PAGE
ABBOT, CHARLES G. Preliminary Statement of the Results of the Smithsonian Observatory Eclipse Expedition, May, 1900	12, 69
The Construction of a Sensitive Galvanometer for Spectro-Bolometric Purposes	18, 1
Samuel Pierpont Langley	23, 271
ABBOT, CHARLES G., and FREDERICK E. FOWLE, JR. A Prism of Uniform Dispersion	11, 135
ADAMS, WALTER S. The Variable Velocity of ϵ *Leonis* in the Line of Sight	11, 307
The Curvature of the Spectral Lines in the Spectroheliograph	11, 309
Observations of the Earlier Spectrum of *Nova Persei*	14, 158
Some Results with the Bruce Spectrograph	15, 214
The Orbit of the Spectroscopic Binary η *Orionis*. (See also Errata, 17, 163.)	17, 68
Some Miscellaneous Radial Velocity Determinations with the Bruce Spectrograph	18, 67
The Radial Velocities of the Brighter Stars in the *Pleiades*	19, 338
Review of: *Die Bilderzeugung in optischen Instrumenten vom Standpunkte der geometrischen Optik*, M. von Rohr	19, 387
Review of: *Spectroscopic Observations of the Rotation of the Sun*, J. Halm	21, 385
The Orbit of the Spectroscopic Binary ζ *Tauri*	22, 115
Some Notes on the H and K Lines and the Motion of the Calcium Vapor in the Sun	23, 45
Sun-Spot Lines in the Spectrum of *Arcturus*	24, 69
ADAMS, WALTER S., and EDWIN B. FROST. See FROST and ADAMS	
ADAMS, WALTER S., and GEORGE E. HALE. See HALE and ADAMS	
ADAMS, WALTER S., GEORGE E. HALE, and HENRY G. GALE. See HALE, ADAMS, and GALE	
AITKEN, R. G. Variations in the Spectrum of the *Orion* Nebula	6, 365
ALBRECHT, SEBASTIAN. Photographic Observations of Comet 1903 *c* (Borrelly)	19, 121
On the Relation between Stellar Spectral Types and the Intensities of Certain Lines in the Spectra	24, 333
A Spectrographic Study of the Fourth Class Variable Stars *Y Ophiuchi* and *T Vulpeculae*	25, 330
On the Distortion of Photographic Films on Glass	25, 349

VOLUME AND PAGE

AMBRONN, L. Remarks on Mr. C. L. Poor's Papers on the Figure of the Sun 23, 343
AMES, J. S. Röntgen's X Rays 3, 294
Henry Augustus Rowland 13, 241
Marie-Alfred Cornu 15, 299
The Henry A. Rowland Memorial Library 17, 247
An Elementary Discussion of the Action of a Prism on White Light 22, 76
The Present Condition of Rowland's Ruling Machines . . 23, 348
Review of: *On the Spectrum of the Electric Discharge in Liquid Oxygen, Air and Nitrogen*, Liveing and Dewar . . 1, 88
Review of: *On Variations Observed in the Spectra of Carbon Electrodes, and on the Influence of One Substance on the Spectrum of Another*, W. N. Hartley 1, 88
Review of: *Flame Spectra at High Temperatures*. II and III, W. N. Hartley 1, 89
Review of: *Beiträge zur Kenntniss der Linien-Spectren*, J. R. Rydberg 1, 90
Review of: *Beiträge zur Kenntniss der Linien-Spectren*, H. Kayser und C. Runge 1, 90
Review of: *Ueber die Spectra von Zinn, Blei, Arsen, Antimon, Wismuth*, H. Kayser und C. Runge 1, 91
Review of: *The Spectrum Researches of J. M. Eder and E. Valenta*. 1, 443
Review of: *Ueber drei verschiedene Spectren des Argons. Ueber die Spectren von Kupfer, Silber und Gold*, Eder und Valenta 3, 396
Review of: *The Radiation of Uranium and Its Salts. Sur diverses propriétés des rayons uraniques*. Henri Becquerel . . 5, 66
Review of: *Mathematical and Physical Papers*, G. G. Stokes . 23, 173
AMES, J. S., R. F. EARHART, and H. M. REESE. Notes on the Zeeman Effect 8, 48
AMES, J. S., and W. J. HUMPHREYS. On the Spectra of Heavy and Light Helium 5, 97
ANDERSON, J. A. Review of Stark's Theory of Radiation . . 24, 362
ANDERSON, W. B. A Spectroscopic Study of the Spark Spectrum . 24, 221
ÅNGSTRÖM, KNUT. The Absolute Determination of the Radiation of Heat with the Electric Compensation Pyrheliometer with Examples of the Application of This Instrument . . 9, 332
The Mechanical Equivalent of the Unit of Light . . . 15, 223
ARRHENIUS, SVANTE. On the Physical Nature of the Solar Corona . 20, 224
ASCHKINASS, E., and H. RUBENS. See RUBENS and ASCHKINASS
AUGUR, A. W. Review of: *Ueber die Ursache der Nordlichter*, Svante Arrhenius 13, 344

	VOLUME AND PAGE
BACKHOUSE, T. W. Photograph of "Flash" Spectrum	8, 198
BAEYER, O. VON. On the Structure of the Finest Spectral Lines	25, 267
BAILEY, S. I. On the Forms of the Disks of *Jupiter's* Satellites	2, 97
The Periods of the Variable Stars in the Cluster *Messier 5*	10, 255
Note on the Relation between the Visual and Photographic Light Curves of Variable Stars of Short Period	10, 261
BAKER, JOHN C., and HENRY CREW. See CREW and BAKER	
BALMER, J. J. A New Formula for the Wave-Lengths of Spectral Lines	5, 199
BALY, E. C. C. The Spectrum of the Aurora	19, 187
BALY, E. C. C., and C. H. DESCH. Ultra-Violet Absorption Spectra in Relation to Physico-Chemical Processes	23, 110
BALY, E. C. C., and A. W. STEWART. The Origin of Color	24, 133
See also STEWART and BALY	
BARNARD, E. E. Photographs of the Milky Way	1, 10
Photographs of the Milky Way near *15 Monocerotis* and near *ε Cygni*	2, 58
On a Photographic Search for a Satellite to the Moon	2, 347
Photograph of the Nebula *N. G. C.* 1499, near the Star *ξ Persei*	2, 350
Celestial Photographs with a "Magic Lantern" Lens	2, 351
Photographic and Visual Observations of Holmes's Comet	3, 41
Note on Professor Campbell's Observations of *Nova Aurigae*	5, 277
Physical and Micrometrical Observations of the Planet *Venus* Made at the Lick Observatory with the 12-Inch and 36-Inch Refractors	5, 299
Astronomical Photography with Small Lenses	6, 446
The Great Nebula of *Andromeda*	8, 226
Observations of the Leonid Meteors of 1898	9, 151
Photograph of the Milky Way near the Star *Theta Ophiuchi*	9, 157
Some Abnormal Stars in the Cluster of *M 13 Herculis*	12, 176
Discovery and Period of a Small Variable Star in the Cluster *M 13 Herculis*	12, 182
Review of: *A General Catalogue of 1290 Double Stars Discovered from 1871 to 1899*, S. W. Burnham	12, 228
Peculiarity of Focal Observations on the Planetary Nebulae and Visual Observations of *Nova Persei* with the 40-Inch Yerkes Telescope. (See also Errata, **14**, 295.)	14, 151
Observations of the Aurora Made at the Yerkes Observatory, 1897–1902	16, 135
On the Change in the Focus for *Nova Persei*	16, 183
Comments on the Early Harvard Photographs of *Nova Persei*	16, 340
Diffused Nebulosities in the Heavens	17, 77
The South Polar Cap of *Mars*	17, 249

VOLUME AND PAGE

BARNARD, E. E. (*Continued*)
Observations of *Nova Geminorum* 17, 376
Photographic Observations of Borrelly's Comet and Explanation of the Phenomenon of the Tail on July 24 . . . 18, 210
Review of: *The Moon, A Summary of the Existing Knowledge of Our Satellite, with a Complete Photographic Atlas*, William H. Pickering 20, 359
The Bruce Photographic Telescope of the Yerkes Observatory . 21, 35
On the Anomalous Tails of Comets 22, 249
Nova Aquilae of 1905 . . . . . 22, 358
A Great Photographic Nebula near π and δ *Scorpii* . . . 23, 144
Note on Professor Newcomb's Observation of the Zodiacal Light 23, 168
The Midnight Illumination above the Northern Horizon near the Time of the Summer Solstice 24, 128
Photographic Observations of Giacobini's Comet (1905 *c*) . 24, 255
On a Nebulous Groundwork in the Constellation of *Taurus* . 25, 218
Nova T Coronae of 1866 . . . . . 25, 279
BARNARD, R. J. A. Note on the *Algol* System 23, 406
BARNES, JAMES. On the Analysis of Bright Spectrum Lines . . 19, 190
On the Spectrum of Magnesium 21, 74
Review of: *Analysis of the Spectrum Lines of Mercury, Cadmium, Sodium, Zinc, Thallium, and Hydrogen*, L. Janicki . . 24, 56
BARR, J. MILLER. The System of *Capella*. (See also Errata, 11, 415.) 11, 248
Spectroscopic Binaries: A Suggestion 15, 65
BARRETT, STORRS B. Review of: *History of Astronomy in the Nineteenth Century*. Fourth Edition, Agnes M. Clerke . 18, 397
Review of: *A Popular Guide to the Heavens*, Robert S. Ball . 24, 367
Review of Fabry and Buisson's Wave-Lengths of Standard Lines 25, 362
BASQUIN, OLIN H. Device for Putting Wave-Lengths on Spectrum Plates 1, 166
The Spectrum of Hydrogen Given by the Metallic Arc of Tin, Copper, Silver, etc. 14, 1
BASQUIN, O. H., and H. CREW. See CREW and BASQUIN
BAXANDALL, F. E. On the Enhanced Lines of Iron, Titanium, and Nickel 21, 337
BELL, LOUIS. On the Discrepancy between Grating and Interference Measurements 15, 157
Note on the Nebula Surrounding *Nova Persei* 16, 38
The Perot-Fabry Corrections of Rowland's Wave-Lengths . 18, 191
BELOPOLSKY, A. The Spectrum of δ *Cephei* 1, 160
On the Spectrographic Performance of the 30-Inch Pulkowa Refractor 1, 366

VOLUME AND PAGE

BELOPOLSKY, A. (*Continued*)
On the Performance of an Auxiliary Lens for Spectrographic Investigations with the 30-Inch Refractor of the Pulkowa Observatory 3, 147
On the Spectroscopic Binary α^1 *Geminorum* 5, 1
New Investigations of the Spectrum of β *Lyrae* 6, 328
Researches on the Spectrum of the Variable Star η *Aquilae* . 6, 393
Note on the Spectrum of *P Cygni* 10, 319
On an Apparatus for the Laboratory Demonstration of the Doppler-Fizeau Principle 13, 15
Spectrographic Observations of Standard Velocity Stars at Pulkowa 19, 85
On the Determination of Radial Velocities at Pulkowa . . 21, 55
BIGELOW, FRANK H. Preliminary Report from the Observations of 1899, Taken to Survey the Cloud Conditions of the Eclipse Track of 1900 . . . . . 10, 220
Reply to E. von Oppolzer's Remarks on Bigelow's "Eclipse Meteorology" 17, 161
BLYTHSWOOD, LORD, and WALTER A. SCOBLE. Photographs of Certain Arc Spectra from λ 5800 to λ 8500 . . . . 24, 125
BOYNTON, W. P. Review of: *The Dynamical Theory of Gases*, J. H. Jeans 22, 224
BRACE, D. B. Note on Steady Liquid Surfaces. (See also Errata, **5**, 350.) 5, 214
On a New System for Spectral Photometric Work 11, 6
BROCA, ANDRÉ, and PH. PELLIN. See PELLIN and BROCA
BROWN, JULIUS A., and EDWIN B. FROST. See FROST and BROWN
BROWN, S. J. Preliminary Results of the United States Naval Observatory Eclipse Expedition, May 1900 . . . . . 12, 58
BURNS, GAVIN J. The Total Light of All the Stars 16, 166
The Proper Motions of the Stars 17, 63
BURNS, KEIVIN. Orbit of the Spectroscopic Binary λ *Andromedae* . 24, 345
BURTON, ALFRED E. Observations of the Total Solar Eclipse of May 28, 1900, by the Massachusetts Institute of Technology Party 12, 96
CALLENDAR, H. L. Letter Regarding Sunshine Recorders . 23, 167, 408
CAMPBELL, W. W. Recent Changes in the Spectrum of *Nova Aurigae* 1, 49
On Determining the Extent of a Planet's Atmosphere . . 1, 85
A Review of the Spectroscopic Observations of *Mars* . . 2, 28
A Spectrographic Determination of Velocities in the System of *Saturn* 2, 127
The Visible Spectrum of the Trifid Nebula 2, 161

	VOLUME AND PAGE
CAMPBELL, W. W. (*Continued*)	
Note on the Spectrum of the Aurora Borealis	2, 162
Observations of the B Band in Stellar Spectra	2, 163
Stars Whose Spectra Contain Both Bright and Dark Hydrogen Lines	2, 177
On Mr. Jewell's Observations of the Spectrum of *Mars*	4, 79
Spectroscopic Notes. (See also Errata, 5, 350.)	5, 233
On the Variations Observed in the Spectrum of the *Orion* Nebula	6, 363
The Mills Spectrograph of the Lick Observatory. (See also Errata, 8, p. vii.)	8, 123
Some Stars with Great Velocities in the Line of Sight	8, 157
The Variable Velocity of η *Pegasi* in the Line of Sight	8, 159
The Variable Velocity of o *Leonis* in the Line of Sight	8, 291
The Variable Velocity of χ *Draconis* in the Line of Sight	8, 292
The Purkinje Phenomenon and the Spectrum of the *Orion* Nebula	8, 317
Notes on the Spectrum of o *Ceti*	9, 31
The Variable Velocity of ζ *Geminorum* in the Line of Sight	9, 86
On the Visible Spectrum of *Nova Sagittarii*	9, 308
The Variable Velocity of ι *Pegasi* in the Line of Sight	9, 310
The Variable Velocity of θ *Draconis* in the Line of Sight	9, 311
A Comparison of the Visual Hydrogen Spectra of the *Orion* Nebula and of a Geissler Tube	9, 312
The Influence of the Purkinje Phenomenon on Observations of Faint Spectra	10, 22
The Spectroscopic Binary *Capella*	10, 177
The Variable Velocities in the Line of Sight of ϵ *Librae*, *h Draconis*, λ *Andromedae*, ϵ *Ursae Minoris*, and ω *Draconis*	10, 178
The Variable Velocity of α *Ursae Minoris* in the Line of Sight	10, 180
The Wave-Length of the Green Coronal Line, and Other Data Resulting from an Attempt to Determine the Law of Rotation of the Solar Corona. (See also Errata, 11, 169.)	10, 186
The Variable Velocities of β *Capricorni* and *v Sagittarii* in the Line of Sight	10, 241
The Variable Velocity of β *Herculis* in the Line of Sight	11, 140
The Determination of the Moon's Theoretical Spectrographic Velocity	11, 141
On the Probable Error of a Radial Velocity Determination	11, 167
Some Spectrographic Results Obtained at the Indian Eclipse by the Lick Observatory-Crocker Expedition	11, 226
The Temperature Control of the Mills Spectrograph	11, 259
James Edward Keeler	12, 239
The Visible Spectrum of *Nova Aquilae*	12, 258

	VOLUME AND PAGE
CAMPBELL, W. W. (*Continued*)	
A Preliminary Determination of the Motion of the Solar System	13, 80
The Motion of ζ *Geminorum* in the Line of Sight	13, 90
Some Stars with Large Radial Velocities	13, 98
Some Recent Results Secured with the Mills Spectrograph	14, 138
Observations of the Spectroscopic Binary η *Pegasi*	14, 202
Observations of the Spectroscopic Binary *Capella*	14, 261
Six Stars Whose Velocities in the Line of Sight Are Variable	16, 114
The Mirror of the Crossley Reflector—A Correction	16, 121
Review of: *Problems in Astrophysics*, Miss A. M. Clerke	18, 156
The Crocker Eclipse Expeditions in 1905	20, 235
Note Concerning the Publication of the Crossley Reflector Photographs of Nebulae and Star Clusters	20, 295
The Variable Radial Velocity of *Sirius*	21, 176
Note on the D. O. Mills Expedition to the Southern Hemisphere	23, 269
The Radial Velocity of *Polaris*	25, 59
CAMPBELL, W. W., and HEBER D. CURTIS. A List of Five Stars Whose Velocities in the Line of Sight Are Variable	18, 306
A List of Nine Stars Whose Radial Velocities Vary	21, 185
On the Radial Velocities of *Polaris*, η *Piscium*, ε *Aurigae*, and β *Orionis*	21, 191
CAMPBELL, W. W., and J. H. MOORE. A List of Eight Stars Whose Radial Velocities Are Variable	25, 54
CAMPBELL, W. W., and W. H. WRIGHT. A List of Nine Stars Whose Velocities in the Line of Sight Are Variable	12, 254
Observations of the Spectrum of *Nova Persei*	14, 269
CAPPS, E. V. Calibration of the Slit in Spectral Photometric Measurements	11, 25
CHAMBERLIN, T. C. On a Possible Function of Disruptive Approach in the Formation of Meteorites, Comets, and Nebulae	14, 17
CHANT, C. A. Some New Determinations of the Reflecting Powers of Glass and Silvered Glass Mirrors	21, 211
CHESTER, COLBY M. Preliminary Results of the United States Naval Observatory Expedition in 1905	23, 128
CHEVALIER, S. On the Brightness of the Inner Edge of the Penumbra in Sun-Spots	24, 278; 25, 273
CLOUGH, H. W. Synchronous Variations in Solar and Terrestrial Phenomena	22, 42
COBLENTZ, WILLIAM W. Preliminary Communication on the Infra-Red Absorption Spectra of Organic Compounds	20, 207
Review of: *Handbuch der Spectroscopie*. III, H. Kayser	22, 281
Regular and Diffuse Reflection	25, 282

	VOLUME AND PAGE
COIT, J. B. Observations of Solar Eclipse, May 28, 1900, at Wadesboro, N. C.	12, 97
COMSTOCK, GEORGE C. On the Application of Interference Methods to the Determination of the Effective Wave-Length of Starlight	5, 26
Research Work at the Washburn Observatory	6, 419
Observations of the Leonid Meteors, November 10–16, 1898	9, 15
The Third Conference of Astronomers and Astrophysicists	10, 58
The Mass of *85 Pegasi*	17, 220
A Proposed Method for the Determination of Radial Velocities of Stars	23, 148
The Luminosity of the Brightest Stars	23, 248
COMSTOCK, GEORGE C., and JOEL STEBBINS. Observations of the Brightness of *Nova Persei*	13, 336
COOK, S. R. On the Escape of Gases from Planetary Atmospheres According to the Kinetic Theory	11, 36
CORNU, M. A. On the Observation and Kinematic Interpretation of the Phenomena Discovered by Dr. Zeeman	6, 378
On Certain New Results Relating to the Phenomena Discovered by Dr. Zeeman	7, 163
On the Law of Diurnal Rotation of the Optical Field of the Siderostat and Heliostat	11, 148
The Atmospheric Absorption of the Visible Rays, Determined from Spectroscopic Observations of the Eiffel Tower Electric Lights in 1889	13, 142
CORTIE, A. L. On the Level of Sun-Spots and the Cause of Their Darkness	7, 239
On the Types of Sun-Spot Disturbances	13, 260
On Drift in Longitude of Groups of Faculae on the Sun's Surface	14, 317
Minimum Sun-Spots and Terrestrial Magnetism	16, 203
Solar Prominences and Terrestrial Magnetism	18, 287
The Spectra of Sun-Spots in the Red and Yellow Regions of the Spectrum	20, 253
On the Connection between Disturbed Areas of the Solar Surface and the Solar Corona	24, 355
COTTON, A. The Present Status of Kirchhoff's Law	9, 237
CRAWFORD, RUSSELL TRACY. The Orbit of the Spectroscopic Binary *η Pegasi*	14, 203
CREW, HENRY. Photographic Maps of Metallic Spectra	2, 318
Normal Spectrum of Zinc Arc	4, 135
Studies of the Electric Arc	6, 418
A Provisional List of Photometric Units	7, 298
Robert Wilhelm Bunsen	10, 301

VOLUME AND PAGE

CREW, HENRY (*Continued*)

On the Arc-Spectra of Some Metals as Influenced by an Atmosphere of Hydrogen 12, 167
Effect of Self-Induction upon Spark-Spectra of Metalloids . 16, 59
Note on the Wave-Length of the Magnesium Line at λ 4481 . 16, 246
On the Conditions Which Govern the Appearance of Spark Lines in Arc Spectra 20, 274
Remarks on Standard Wave-Lengths 20, 313
Review of: *The Luminosity of Gases.* III, A. Smithells . . 1, 266
Review of: *Popular Scientific Lectures,* Ernst Mach . . . 1, 267
Review of: *Zur Theorie der Verbreiterung der Spectrallinien,* Fürst B. Galitzin 2, 324
Review of: *Molecules and the Molecular Theory of Matter,* A. D. Risteen 2, 392
Review of: *Ueber Gesetzmässigkeiten in den Spectren festen Körper,* F. Paschen 5, 60
Review of: *Experimental Determinations of the Temperature in Geissler Tubes,* R. W. Wood 5, 63
Review of: *Ueber einen Versuch eine electrodynamische Sonnenstrahlung, und über die Aenderung des Uebergangswiederstand bei Berührung zweier Leiter durch electrische Bestrahlung,* J. Wilsing und J. Scheiner 5, 219
Review of: *Ueber die ultravioletten Funkenspectra der Elemente,* Franz Exner und E. Haschek 5, 290
Review of: *Elementary Text-Book on Physics,* Anthony and Brackett 5, 360
Review of: *Ueber einige Emissionsspectra des Cadmiums, Zinks, und der Haloid Verbindungen des Quecksilbers und einiger anderen Metallen,* A. C. Jones; *The Multiple Spectra of Gases,* John Trowbridge and Theodore Wm. Richards; *On the Propagation of Waves along Connected Systems of Similar Bodies,* Lord Rayleigh; *On a Relation between the Spectrum of Hydrogen and Acoustics,* A. S. Herschel . . 7, 150
Review of Professor J. J. Thomson's Work on the Structure of the Atom 11, 170
Review of: *Recherches expérimentales sur les spectres d'étincelles,* G. A. Hemsalech 14, 370
Review of: *Handbuch der Spectroscopie.* Band I, H. Kayser . 15, 150
Review of: *Lehrbuch der Physik.* Band I, O. D. Chwolson . 18, 396
Review of: *Atlas of Emission Spectra of Most of the Elements,* A. Hagenbach and H. Konen 22, 226
Review of: *Spectroscopy,* E. C. C. Baly 23, 170
Review of: *Vorlesungen über theoretische Spektroskopie,* A. Garbasso 24, 303

SPECTROSCOPIC BINARIES (*Continued*)

Nine Stars with Variable Velocities [*12 Persei, ξ Ursae Majoris, 93 Leonis, d Boötis, β Scuti, 113 Herculis, 2 Sculi, η Andromedae, κ Pegasi*]. *W. W. Campbell* and *W. H. Wright* . 12, 254

Some Recent Results with the Mills Spectrograph [*π Cephei, o₁ 31 Cygni, ξ Piscium, τ Persei, ξ₁ Ceti, ε Hydrae, δ Equulei, Polaris, δ Orionis* (*α Persei, θ Ursae Majoris*, Groombridge 1830)]. *W. W. Campbell* 14, 138

Some Results with the Bruce Spectrograph [*o Persei, δ Librae, Sirius*]. *Walter S. Adams* 15, 214

Six Stars Whose Velocities Are Variable [*φ Persei, η Geminorum, γ Canis Majoris, ζ Herculis, α Equulei, o Andromedae*]. *W. W. Campbell* 16, 114

Five Stars Whose Radial Velocities Vary [*δ Ceti, ν Eridani, π⁵ Orionis, ζ Tauri, η Virginis, π⁴ Orionis*]. *Edwin B. Frost* and *Walter S. Adams* 17, 150

Additional Stars of the *Orion* Type Whose Velocities Vary [*τ Tauri, ψ Orionis, η Hydrae*]. *Edwin B. Frost* and *Walter S. Adams* 17, 246

Four Stars Whose Velocities Are Variable [*ν Andromedae, π⁴ Orionis, σ Geminorum, ι Argus*]. *H. M. Reese* . . 17, 308

Two Stars with Variable Velocities [*u Herculis, 57 Cygni*]. *Edwin B. Frost* and *Walter S. Adams* 17, 381

Miscellaneous Velocity Determinations with Bruce Spectrograph. [*61 Cygni, ε Ursae Majoris, β Scorpii, ε Herculis*]. *Walter S. Adams.* 18, 67

Five Stars with Variable Velocities [*γ Corvi, η Virginis, α Draconis, ε Herculis, δ Aquilae*]. *W. W. Campbell* and *Heber D. Curtis* 18, 306

Ten Stars Whose Radial Velocities Vary [*π Andromedae, ξ Cassiopeiae, 22 o Orionis, χ Aurigae, ι Orionis, ν Orionis, 18 Aquilae 2 Lacertae, 6 Lacertae, 1* Hev. *Cassiopeiae*]. *Edwin B. Frost* and *Walter S. Adams* 18, 383

Eight Stars Whose Velocities Vary [*g Persei, ε Persei, θ¹ Orionis, θ² Orionis, σ Orionis, ξ Orionis, S Monocerotis, η Hydrae*]. *Edwin B. Frost* and *Walter S. Adams* 19, 151

Four Stars with Variable Velocity [*9 Camelopardi, κ Cancri, μ Sagittarii, δ¹ Lyrae*]. *Edwin B. Frost* and *Walter S. Adams* . 19, 350

Five Stars Having Variable Radial Velocities [*α Andromedae, α Librae, σ Scorpii, X Sagittarii, ε Capricorni*]. *V. M. Slipher* 20, 146

Nine Stars Whose Radial Velocities Vary [*α Andromedae, ζ Ceti, γ Geminorum, α² Geminorum, η Boötis, ξ Serpentis, ζ Lyrae, τ Sagittarii, 71 Aquilae*]. *W. W. Campbell* and *Heber D Curtis* 21, 185

Algol Type Variables.

+17°4367 *W Delphini*. *Edward C. Pickering* . . 3, 77, 163, 200, 213; 4, 320; 7, 23

+45°3062 in *Cygnus*. *Edward C. Pickering* . . . 10, 126

Densities of. *Henry Norris Russell* 10, 315

J. H. Jeans 22, 93

SY Cygni, Mme. Ceraski's Second. *Edward C. Pickering* 11, 165

RR Puppis and *V Puppis*, Orbits of. *A. W. Roberts*. . 13, 177

Early Observations of. *Edward C. Pickering* . . . 15, 229

+43°4101, New. *Edward C. Pickering* 15, 343

13.1902, Williams' New. *Edward C. Pickering* . . 16, 337

−15°4905, New *Edward C. Pickering* 20, 296

S Antliae. *Edward C. Pickering* 9, 179

Y Aquilae. *Edward C. Pickering* 8, 57

1921 *W Aurigae*. *J. A. Parkhurst* 18, 309

X Cancri, *Es.-Birm. 281*. *T. E. Espin* 1, 351

δ Cephei, Short Period. *L. A. Eddie* 3, 227

X Cephei. (See also Errata, 17, 163.) *J. A. Parkhurst* . 17, 48

7792 *SS Cygni*. *J. A. Parkhurst* and *Zaccheus Daniel* . . 12, 259

Y Cygni, Observations and Ephemerides of. *N. C. Dunér* . 14, 149

in Cluster *M 13 Herculis*, Discovery and Period of. *E. E. Barnard* 12, 182

SV Herculis, New. *Edward C. Pickering* 20, 358

Z Herculis, On Periodic Changes of. *N. C. Dunér* . 1, 285; 3, 348

6871 *V Lyrae*. *J. A. Parkhurst* 18, 33

Y Ophiuchi and *T Vulpeculae*, Spectrographic Study of the Fourth Class. *Sebastian Albrecht* 25, 330

in *Orion* Nebula. *Edward C. Pickering* 19, 289

in *Orion* Nebula in Connection with Chart for *T Orionis*. *John G. Hagen* 19, 344

U Pegasi. *Edward C. Pickering* 7, 141

G. W. Myers 8, 163

W Sagittarii, Applications to Study of. Method of Measurement and Reduction of Spectrograms for Determination of Radial Velocities. *Ralph H. Curtiss* 20, 149

W Ursae Majoris, Unusually Short Period of New. *G. Müller* and *P. Kempf* 17, 201

3416 *S Velorum*. *James E. Keeler* 1, 262

U Vulpeculae and *ST Cygni*. *Edward C. Pickering* . . 9, 179

Discovery of, from Their Photographic Spectra. *Edward C. Pickering* 1, 27

VOLUME AND PAGE

VARIABLE STARS (*Continued*)
Light Curves of, Determined Photometrically. *Edward C. Pickering* 3, 281
Work of the Harvard Observatory on. *Edward C. Pickering* . 6, 418
Magnitudes of Father Hagen's Atlas of. *J. G. Hagen* . . 6, 441
in Clusters. *Edward C. Pickering* . . 2, 321; 6, 258; 7, 208
Comparison Stars for. *Edward C. Pickering* 7, 308
of Short Period. *Edward C. Pickering* 8, 55
of Type III, Position in Reference to Milky Way. *T. E. Espin* 10, 169
in Cluster *Messier 5*, Periods of. *S. I. Bailey* . . . 10, 255
of Short Period, Relation between Visual and Photographic Light Curves of. *S. I. Bailey* 10, 261
Observations of, with 12-Inch and 40-Inch Refractors. *George E. Hale* 12, 52
in Clusters. Rate of Increase in Light. *Edward C. Pickering* 8, 257; 12, 159
Co-operation in Observing. *Edward C. Pickering* . . . 13, 167
Notes on. *J. A. Parkhurst* 14, 169
Publication of New Catalogue of. *Messrs. Dunér, Hartwig, Müller, Oudemans* 14, 214
Spectrographic Observations of Certain. *Edwin B. Frost* . . 22, 213
Photographic Photometry of Short-Period. *J. A. Parkhurst* and *F. C. Jordan* 23, 79
Spectra of Known. *Edward C. Pickering* . . 22, 90; 23, 260
VARIATIONS, Close Binary Systems and Their Relation to Short Period. *Alexander W. Roberts* 2, 283
in Solar and Terrestrial Phenomena, Synchronous. *H. W. Clough* 22, 42
Vega, Heat Radiation of. *E. F. Nichols* 13, 101
VELOCITIES OR VELOCITY, RADIAL. For Variable Velocities see SPECTROSCOPIC BINARIES.
in System of *Saturn*. *W. W. Campbell* 2, 127
Differential Method of Determining. *Edwin B. Frost* . . 2, 235
of Stars, Relative. *Edward C. Pickering* 4, 370
Sources of Error in Investigation on. *H. C. Vogel* . . . 7, 249
Stellar. *H. C. Lord* 8, 65
Some Stars with Great. *W. W. Campbell* 8, 157
of α *Aquilae*. *H. C. Vogel* 9, 1
Reduction to Sun of Observations for. *Frank Schlesinger* . 9, 159
Methods of Determining. *H. Deslandres* 9, 167
Constants for Determination of. *Frank Schlesinger* . . 10, 1
for Determining Parabolic Orbit. *F. R. Moulton* . . . 10, 14
Moon's Theoretical. *W. W. Campbell* 11, 141

VOLUME AND PAGE

VELOCITIES OR VELOCITY, RADIAL (*Continued*)
Determination, Probable Error of. *W. W. Campbell* . . 11. 167
Determination of Stellar. *H. C. Vogel* 11, 373
Some Stars with Large. *W. W. Campbell* 13, 98
of α *Persei*. *H. C. Vogel* 13, 320
Note on. *Sir William Huggins* 14, 369
of Gaseous Nebulae. *J. Hartmann* 15, 287
of the *Orion* Nebula. *H. C. Vogel* 15, 302
Edwin B. Frost and *Walter S. Adams* . 19, 350
of Selected Stars, Co-operation in Observing. *Edwin B. Frost* . 16, 169
Star with Great. *H. M. Reese* 17, 310
Standard Stars 1902-1903, Observations of. *Edwin B. Frost* and *Walter S. Adams* 18, 237
A. Belopolsky 19, 85
of Brighter Stars in *Pleiades*. *Walter S. Adams* . . . 19, 338
Observations with the Bruce Spectrograph. *Edwin B. Frost* and *Walter S. Adams* 19, 350
Constants for Some Stars of the *Orion* Type. *Emily Elisabeth Dobbin* 19, 382
Method of Measurement and Reduction of Spectrograms for Determination of. Application to Study of Variable Star *W Sagittarii*. *Ralph H. Curtiss* 20, 149
Determination of, at Pulkowa. *A. Belopolsky* 21, 55
of Thirty-One Stars, Observations of, Made at Emerson McMillin Observatory. *H. C. Lord* 21, 297
near Full Moon, On Computation of Moon's. *R. H. Curtiss* . 21, 376
of Standard Stars (1905), Observations with the Lowell Spectrograph of. *V. M. Slipher* 22, 318
Proposed Method for Determination of. *George C. Comstock* . 23, 148
Determination of, by Objective Prisms. *Edward C. Pickering* . 23, 255
Determinations, Short Method of Computing Approximate Value of Reduction to Sun in. *H. K. Palmer* 24, 51
of Metallic Particles in Spark Discharge. *Arthur Schuster* . 25, 277
S Velorum, The Variable Star 3416. *James E. Keeler* . . . 1, 262
Vela [*X Centauri*], New Variable Star in. *M. Fleming* . . . 2, 354
Venus, Mascari's Observations of 3, 226
Physical and Micrometrical Observations of, Made at Lick Observatory. *E. E. Barnard* 5, 299
Atmosphere of. *Henry Norris Russell* 9, 284
VISIBILITY of Fine Lines in a Telescope, Limit of. *A. A. Michelson* 2, 60
U Vulpeculae and *ST Cygni*, Variable Stars. *Edward C. Pickering* 9, 179
T Vulpeculae, Radial Velocity of. *Edwin B. Frost*. . . . 20, 296

VOLUME AND PAGE

T Vulpeculae (*Continued*)
and *Y Ophiuchi*, A Spectrographic Study of the Fourth Class Variable Stars. *Sebastian Albrecht* **25**, 330
WASHBURN Observatory, Research Work at. *George C. Comstock* . **6**, 419
WATER Vapor, Detection of Lines of, in Spectrum of a Planet. *James E. Keeler* **4**, 137
WAVE-LENGTH. See also SPECTRUM and LINES.
of D_3 Line in Spectrum of Chromosphere. *George E. Hale* . **2**, 384
of Some of the Helium Lines in Vacuum Tube and of D_3 in the Sun. *J. F. Mohler* and *L. E. Jewell* **3**, 351
Effect of Pressure on. (See also Errata, **4**, 374.) *J. F. Mohler* **4**, 175
Effect of Pressure on. *W. J. Humphreys* . . . **6**, 169, 428
of Starlight, Application of Interference Methods to Determination of Effective. *George C. Comstock* **5**, 26
Theoretical Considerations Respecting Effect of Pressure on. *J. Wilsing* **7**, 317
Note on the Foregoing Article. *Charles Godfrey* . . . **8**, 114
of the Hydrogen Line *Hδ*. *W. H. Wright* **9**, 50
of *Hδ* and Appearance of Solar Spectrum near Hydrogen Lines. *Lewis E. Jewell* **9**, 211
of Green Coronal Line. *W. W. Campbell* **10**, 186
of Corona Line. *C. A. Young* **10**, 306
Determinations and General Results Obtained at Eclipse of January 22, 1898. *J. Evershed* **13**, 223
Heat Radiation of Long, Emitted by Black Bodies. *H. Rubens* and *F. Kurlbaum* **14**, 335
Selective Absorption as a Function of. *George E. Hale* . . **15**, 227
of the Magnesium Line at λ 4481. *Henry Crew* . . . **16**, 246
of Cadmium Line at λ 5086. *Charles Fabry* **19**, 116
On Establishing New Standards of. *A. Perot* and *Ch. Fabry* . **20**, 318
New Standards of. *H. Kayser* **20**, 327
in Spark Spectrum, Effect of Capacity and Self-Induction upon. *George W. Middlekauff* **21**, 116
in Lines of Spark Spectra, Variability of. *Norton A. Kent* . **22**, 182
WAVE-LENGTHS, Preliminary Table of Solar Spectrum. *Henry A. Rowland*
λλ 2975.587–3259.567 . . . . . **4**, 106, 278
